THE DECISION

# Safr: what to build next

Full council · 6 advisors · 3 rounds

Which comes next for Safr: cloud and auth, the submission pack, more destinations, or selling the preview first.

**GO** THE COUNCIL'S CALL

**Choose D: build nothing new yet. Run real family files through the current preview at UAE agencies, and let what they ask for decide whether A or B comes next. C waits until three agencies pay.**

Confidence 8/10 · 1 endorse, 5 amend, 0 dissent

## Scores

| | | |
|---|---|---|
| A | Cloud, auth, agency isolation | 4.4 |
| B | 1-click submission pack | 4.5 |
| C | Australia and Turkey | 1.5 |
| **D** | **Build nothing, sell the preview** RECOMMENDED | 9 |

Each advisor scores every option from 1 to 10, weighted by how much their area matters to this decision.

## Why the council landed here

- **Paul Graham:** With zero users every build is a guess; watching real files is the fastest way to learn which build matters.
- **Elon Musk:** The limit is zero real files, not missing features. Measure real applications per week.
- **Jeff Bezos:** Storing passport data is the only decision that is hard to undo; keep storing nothing until paying customers justify it.

Simulated advisors built from each person's public work. They are not the people and do not speak for them.

## How each advisor scored it

| ADVISOR | WEIGHT | A | B | C | D | VOTE |
|---|---|---|---|---|---|---|
| **Paul Graham** | 3 | **4** | **4** | **1** | **9** | Amend |
| **Alex Hormozi** | 3 | **5** | **4** | **1** | **9** | Amend |
| **Jeff Bezos** | 2 | **5** | **5** | **2** | **9** | Endorse |
| **Warren Buffett** | 2 | **4** | **5** | **2** | **9** | Amend |
| **Elon Musk** | 2 | **4** | **5** | **2** | **9** | Amend |
| **Gary Vaynerchuk** | 1 | **4** | **5** | **2** | **9** | Amend |

## Watch out

**Alex Hormozi: "Make the price ask the same day as the first real file: $900 prepaid for 3 months, and the two weeks become a money-back window, not a free trial."**

For this to be right: Agencies prepay after watching one real file go through.

## What to do next

- **By 8 Nov:** Book 10 demos; time 5 real family files at one agency counter; post the filmed file on LinkedIn.
- **By 22 Nov:** 20 pitches, 10 real files, login trigger decided, one file submitted at VFS.
- **By 15 Dec:** 3 paid pilots, first paid commitment by 1 Dec.
- **Cheapest test:** One day at one agency counter timing 5 real family files by hand against Safr.
- **Kill it if:** By 15 Dec, 10+ real files saved 30+ minutes each and no agency pays, or no agency uses Safr without the builder present: rethink price and buyer before building.

## Where they fought

- **Can a real pilot run on the no-login preview?**
  Hormozi wanted login first. Elon and Buffett showed the preview stores nothing and pilot money cannot fund A. All six agreed to start on the preview with a trigger for a login-only A.
- **Charge up front or free usage first?** Hormozi and Buffett wanted cash first, Graham and Elon usage first. They settled on free use, then a price ask at file 10 or day 14. Hormozi reopened it in Round 3 and was outvoted.
- **Is a five-day B worth building as a demo closer?**
  Bezos and Buffett backed a capped thin B. Four seats said assemble the pack by hand. Nobody answered that, and both moved by Round 3.
