AI VISA DOCUMENT CONCIERGE

Less form filling. More time for customers.

From traveller documents to one printable application pack, with your agency in control.

The documents arrive. The admin begins.

30–60 min

to fill one application by hand

Retype the same traveller details

Move information from passports and IDs into every form.

Correct mistakes and rework

One missed detail can send the pack back for edits.

Finish after the customer has left

Preparation spills into late nights.

Reported in the founders' conversations with agencies. Not yet a measured Safr benchmark.

You supply the documents. Safr prepares the pack.

01 / UPLOAD

Scan passports and Emirates IDs

Safr reads names, numbers and expiry dates, and flags unreadable pages.

02 / PREPARE

Fill the form. Build the pack.

Families are linked under one trip. Embassy rules are checked as you go.

03 / REVIEW

Check the flags. Confirm the details.

Your team checks every field. Declarations and signatures are left for the applicant.

04 / PRINT

Download one PDF. Hand it over.

Print the reviewed pack, with a cover sheet for VFS, TLS or BLS.

Supported today: Schengen and Japan official forms, filled. UK Standard Visitor and US DS-160 question guides. Safr prepares documents; it does not book appointments or submit applications.

THE DELIVERABLE

One printable pack. Not scattered files.

Give the customer a prepared handover, not a folder of separate drafts.

APPLICATION PACK / PDF

- Cover sheet and checklist
- Embassy-form application
- NOC and parental consent
- Travel itinerary
- Supporting documents

Contents depend on the case and documents supplied. Generated documents need review and any required signatures. Illustrative pack structure.

Keep your team focused on customers, not retyping.

01	**Less repetitive preparation**	The traveller's documents fill the application and build the pack.
02	**Earlier issue flags**	Passport validity, residency, bank statements and minor-consent rules are checked before you print.
03	**A simpler customer handover**	One PDF instead of separate files put together at the end.

Designed to reduce preparation effort. Time savings have not yet been independently measured. Visa decisions remain with the relevant authorities.

YOUR CLIENTS' DATA

Passport scans are never stored. Your clients stay yours.

SCANS / NOT KEPT

Read in memory, then discarded

Passport and Emirates ID images are processed in memory and deleted once the details are read. They are never written to disk, saved to cloud storage or logged.

DETAILS / LOCKED TO YOUR AGENCY

Only the application details are kept

Names, document numbers, dates and trip answers sit in a database where each record is locked to one agency. No other agency can see or search your clients.

Built to keep personal data to the minimum under the UAE Personal Data Protection Law. Data processing terms to be agreed with each agency.

Start with a pilot. Stay if it saves time.

PROPOSED PRICING / AED

FOUNDING AGENCIES

90-DAY PILOT · PAID UPFRONT

3,000 AED

Up to 150 applications over 90 days

We work alongside your team.

Setup at your counter and a review day each month.

After the pilot: AED 2,250 a month

50 application credits included (AED 45 each). Unused credits roll over.

AED 50 per extra application

Keep preparing cases after included credits run out.

Annual: 12 months for the price of 10

Two months free on the annual subscription.

Indicative commercial structure, not a final price offer. Billing terms and VAT treatment to be agreed.

NEXT STEP / ONE REAL CASE

Bring one family file.
We'll time it with you.

Run one real case through Safr at your counter, side by side with how you do it today. If it saves your team time, start the 90-day pilot.

BOOK A COUNTER SESSION

safr-embassy-ready-travel.lovable.app

Use a consented or redacted case. Schengen and Japan forms are filled today; UK and US are guided.
